

Electricity

-  BULB
-  BUZZER
-  MOTOR
-  WIRE
-  BATTERY/CELL
-  SWITCH

An electrical conductor lets electricity pass through. They are often metals but it also includes water.

An electrical insulator does not let electricity pass through.

DANGER! HIGH VOLTAGE!
Electricity is everywhere so always be safe. Be careful of mains switches, open sockets and any signs to do with electricity. The human body is 80% water so it conducts electricity. If someone has had a shock always turn the electricity off first, then call for help!
